WORK EXPERIENCE

Featherwebs Technology

Full -Time . Onsite

Associate UI/UX Designer (Started as a trainee)

August 2023 - **Present**

- Delivered impactful presentations to clients, showcasing design concepts, gathering feedback, and aligning solutions with client goals.
- Designed an HRMS product, marking my first experience in product design, where I focused on creating user-centric workflows and scalable design systems while actively learning and growing in this domain.
- Experience in designing website (including government websites), and mobile applications.

Krafters Technology

Internship . Onsite

UI/UX Designer Intern

March2023 - August2023

- Assisted in conducting user research to understand target users' needs, preferences, and behaviors.
- Developed wireframes, prototypes, and mockups to effectively communicate design ideas and concepts.
- Participated in design reviews and contribute constructive feedback to improve design quality.

PROJECTS

NCELL Mobile Application

Mobile Application Redesign

- Redesigned the Ncell mobile application as a UI Designer, focusing on improving the user interface for better navigation, enhanced aesthetics, and overall usability.

Kirtipur Municipality Website

Website Redesign

- **One of the projects I am proud of.** Redesigned the Kirtipur Municipality website with a focus on improving user experience for a diverse audience. Worked on information architecture, UX enhancements, and a clean, modern UI using suitable fonts and colors. This website is soon going live.

IMAC Engineering Co. Ltd

Website Design

- Designed the website for IMAC Engineering Co. Ltd., a Plant Engineering company based in Japan.
- Designed a user interface that aligned closely with Japanese design aesthetics and user preferences.

Tech Talk: Language Translator

Mobile Application

- Support staffs of **IMAC Engineering** in learning and translating Japanese for workplace communication.

GCE Group

Website Redesign

- Focused on creating a professional and user-centric design to showcase their services and establish a strong online presence.

Swift HRMS

Product Designing

- Designing user-centric interfaces to streamline HR processes, including user management, attendance, payroll, and other essential features.
